CHAPTER ONE

What This *System Does*

The Wave EMI System is an internal tool to help process salary disbursement requests.

When you send an email with a payroll request to the system, it will:

AUTOMATED PROCESSING PIPELINE

From inbox to *approved ticket* in under a minute.

01

Read your email automatically

02

Read your attached file (PDF, image, or bank slip)

03

Create a ticket in a dashboard for your team to review

04

Send you back a confirmation email

05

Let your team approve and prepare payment files

In short: Email in → Ticket out. The system saves you from copying payroll data by hand.

CHAPTER TWO · CRITICAL

Important — *Data Safety Rule*

Please read this section carefully before using the system.

! MANDATORY READ · DATA SAFETY · DO NOT SKIP

The Rule: Use *FAKE data only*.
Never use real customer data.

This system is **in testing phase**. It works well, but it is **not yet approved for enterprise banking use**. This means:

- The servers that run the system are **not yet bank-compliant**.
- The AI that reads your emails is a **consumer-grade AI**, not an enterprise AI.
- Your data passes through **cloud services outside of bank-controlled infrastructure**.

WHAT THIS MEANS FOR YOU

✕ DO NOT SEND

Real customer names, real phone numbers (real MSISDN), real NRC numbers, real account numbers, real company names of actual Wave Money clients, or real amounts tied to real people.

✓ DO USE

Made-up (fake, mock, fabricated) names, numbers, and amounts for all testing.

WHY THIS MATTERS

If real customer data leaks through this system, the consequences fall on **you as the user**, not on Trustify Technology. By continuing to use this system, you agree that:

01 You are responsible for the data you submit.

02 You will use only fake / mock / fabricated data for all testing.

03 Using real customer data is a violation of this handover agreement.

04 Trustify Technology is not liable for any data exposure caused by user misuse.

If you are unsure whether data is "fake enough", **ask DK before sending.**

CHAPTER THREE

Before *You Start*

You will need:

- [ ] An email account ending in `@zeyalabs.ai` (for example, `khanhnguyen@zeyalabs.ai`)
- [ ] Internet connection
- [ ] A web browser (Chrome, Edge, or Firefox recommended)
- [ ] The dashboard URL saved as a bookmark: `https://project-ii0tm.vercel.app`
- [ ] This guide (keep it for reference)

> **IMPORTANT RULES ABOUT EMAIL ADDRESSES**
>
> → The **sender** of every request email **must be** from the `@zeyalabs.ai` domain.
>
> → The **receiver** (where you send the email to) **must always be** `emoney@zeyalabs.ai` .
>
> → If you send from a Gmail, Yahoo, or any other address, the system will ignore your email.

CHAPTER FOUR · PROCEDURE

How to Submit a *Disbursement Request*

Follow these steps every time you want to create a new ticket.

STEP

01

Open your email client

Use Outlook, Microsoft 365 Web, or any email tool connected to your `@zeyalabs.ai` account.

STEP

02

Start a new email

Click **New Email**.

STEP

03

Fill in the "To" field

Type exactly:

```
emoney@zeyalabs.ai
```

STEP

04

Write the subject line

Use this simple format:

```
Salary disbursement — [Fake Company Name] — [Fake Amount] [Currency]
```

Example of a good subject:

```
Salary disbursement — Test Corp Ltd — 2,450,000 MMK
```

STEP

05

Write the email body

Include these fields (simple format, no HTML needed):

```
Company: [Fake company name]
Total amount: [Amount and currency]
Number of employees: [Number]
Disbursement type: [SalaryToMA or SalaryToOTC]

Approvals:
- [Fake approver name 1] ([Role]) — Approved
- [Fake approver name 2] ([Role]) — Approved

Attached: payroll breakdown with employee details.
```

> **Tip:** *You can copy the template from Section 8 of this guide and change the values.*

STEP

06

Attach your file

Attach **ONE** of the following file types:

FILE TYPE	EXTENSION	EXAMPLE
PDF document	`.pdf`	A bank slip or payroll report
JPEG image	`.jpg` or `.jpeg`	A photo of a handwritten payroll
PNG image	`.png`	A screenshot of a payroll table

RULES

- File size must be **less than 10 MB**.
- Do **not** password-protect the file. The system cannot read password-protected files.
- Attach **only one file** per email.
- The attachment should contain fake payroll data that matches the amounts in your email body.

STEP

07

Send the email

Click **Send**.

STEP

08

Wait for confirmation (about 1 minute)

Within about 1 minute, you will receive a **confirmation email** in your inbox from `emoney@zeyalabs.ai`. The email will contain:

- A **Ticket ID** (example: `TKT-005`)
- A summary of what the system read from your email and attachment
- A list of checks the system performed
- A link to the ticket in the dashboard

If you do **not** receive a confirmation email within 5 minutes, see Section 10 (Getting Help).

CHAPTER FIVE · INTERFACE

How to Use the *Dashboard*

The dashboard shows all submitted tickets and their progress.

STEP

01

Open the dashboard

In your browser, go to:

```
https://project-ii0tm.vercel.app
```

> *Bookmark this page — you will use it every day.*

STEP

02

Review the summary bar at the top

You will see four numbers at the top:

PIPELINE QUEUE — LIVE

How many emails are currently being processed:
Pending: waiting to be read
Processing: being read right now
Completed: done, ticket

ALL EMAILS

Total number of tickets created.

MISMATCH

Tickets that need human review (something does not match).

created
Failed: system could not read it

READY FOR FINANCE

Tickets ready for the Finance team to approve.

STEP

03

Click on a ticket to open it

Each ticket row shows:

- Ticket ID (example: `TKT-005`)
- Company name
- Type (MA or OTC)
- Amount
- Status

Click any row to see full details.

STEP

04

Review ticket details

Inside a ticket, you can see:

SECTION	WHAT IT TELLS YOU
Amount Check	Three-way match: email vs attachment vs employee total

SECTION	WHAT IT TELLS YOU
Original Attachment	The file you submitted (click to expand)
Auto-Extracted from Email	Data the AI read from your email body
From Attachment	Data the AI read from your attached file
Employee list	Names, wallet numbers, and amounts from your attachment
Field comparison table	Side-by-side view of what email said vs what attachment said

STEP

05

Take action on the ticket

Depending on status, you may:

Save & Submit for Finance
send the ticket for approval

Return to Client
send it back if data is wrong

Generate CSV for Finance
produce the payment files

Understanding *Ticket Status*

Every ticket has a status. Here is what each means:

Normal

All checks passed. Amounts match.

WHAT YOU SHOULD DO

REVIEW AND APPROVE IF READY.

Ready for Finance

Checked by Maker. Waiting for Finance.

WHAT YOU SHOULD DO

FINANCE TEAM SHOULD APPROVE OR REJECT.

Amount Mismatch

Email amount does not match attachment amount.

WHAT YOU SHOULD DO

SEE SECTION 7. ASK THE SENDER TO RESUBMIT.

Asked Client

System asked the client for missing info.

WHAT YOU SHOULD DO

WAIT FOR CLIENT TO RESUBMIT.

Failed

System could not read the email or attachment.

WHAT YOU SHOULD DO

SEE SECTION 7. CONTACT DK IF UNCLEAR.

Risk levels

Each ticket also shows a **Risk Level**:

Low

all checks passed, normal flow

Medium

some data missing but not blocking

High

amount mismatch or missing required approver

What to Do When a *Ticket Is Flagged*

CASE A

"Amount Mismatch"

WHAT HAPPENED

The amount written in the email does not match the total in the attached file.

EXAMPLE

```
Email says: 4,500 USD
Attachment total: 24,500 USD
```

WHAT TO DO

1. Do **not** approve the ticket.
2. Click **"Return to Client"** in the dashboard.
3. Ask the sender to resubmit a new email with the correct amount.
4. Close or ignore the old ticket.

CASE B

"Failed" — System could not read the document

WHAT HAPPENED

The attached file could not be read by the AI. Common reasons:

- The file is password-protected.
- The handwriting is unclear.
- The image is blurry or upside down.
- The file is corrupted.

WHAT TO DO

1. The sender will automatically receive an email explaining the problem.
2. Ask the sender to resubmit with a clearer file.

3. If the problem repeats, tell DK.

CASE C

No confirmation email received within 5 minutes

WHAT TO DO

1. Check your spam / junk folder.
2. Verify the email was sent to exactly `emoney@zeyalabs.ai` (no typo).
3. Verify the sender email ends in `@zeyalabs.ai` .
4. If still no email, ping DK on Teams.

Example of *Good Fake Test Data*

Copy and adapt this example for your own tests. All names, numbers, and amounts are **fabricated** — safe to use.

Example email

NEW MESSAGE · DRAFT

TO emoney@zeyalabs.ai

SUBJECT Salary disbursement — Test Corp Ltd — 2,450,000 MMK

```
Company: Test Corp Ltd
Total amount: 2,450,000 MMK
Number of employees: 3
Disbursement type: SalaryToMA

Approvals:
- Test Approver One (Sales HOD) — Approved on 2026-04-20
- Test Approver Two (Finance Manager) — Approved on 2026-04-20

Attached: payroll breakdown.

Regards,
[Your name] (QA test)
```

Attachment: A fake PDF or image containing:

#	EMPLOYEE NAME	WALLET (FAKE MSISDN)	AMOUNT
1	John Test Doe	`09111111111`	800,000 MMK
2	Jane Sample Smith	`09222222222`	850,000 MMK
3	Bob Mock Johnson	`09333333333`	800,000 MMK

Rules for fake data

DATA TYPE	FAKE PATTERN TO USE	EXAMPLE	REAL PATTERN TO AVOID
Company name	"Test ___", "Sample ___", "Mock ___"	Test Corp Ltd	CB Bank, KBZ, Yoma, AYA, any real company
Employee name	Obvious fake names	John Test Doe, Ma Ma Sample	Any real person's name
Phone / MSISDN	Repeated digits or `0911...` `0922...`	`09111111111`	Any real Myanmar phone number
NRC number	Do not use at all	(leave blank)	Any real NRC pattern
Bank account	Round fake numbers	`12345678`, `87654321`	Any real account number
Amount	Round fake numbers	2,450,000 MMK	Amounts that match real payrolls
Approver name	"Test Approver One", "Fake HOD"	Test Approver One	Any real approver (Thet Hnin Wai, etc.)

CHAPTER NINE · LIMITATIONS

What the System *Cannot Do Yet*

Please know these limitations. If you hit any of them, it is **not a bug** — it is a known limit.

LIMITATION	IMPACT	WORKAROUND
Password-protected files	System cannot open them	Send the file without password protection
Myanmar handwritten documents	AI may not read handwriting correctly	Send typed/printed documents when possible
Files larger than 10 MB	System will reject the attachment	Reduce file size or split into smaller chunks
Non- `@zeyalabs.ai` senders	Email will be ignored	Always send from your `@zeyalabs.ai` account
Multiple attachments per email	Only the first is processed	Send one attachment per email
Long Myanmar script text	AI may translate inconsistently	Use English where possible for test data
Real-time status updates	Dashboard may take 30-60 seconds to refresh	Refresh the page manually if needed

CHAPTER TEN · SUPPORT

Getting *Help*

First: try to solve it yourself

01 Re-read the relevant section of this guide.

02 Check that your email followed all the rules in **Section 4**.

03 Verify your data is fake per **Section 2** and **Section 8**.

Next: contact DK

If the problem persists, contact:

PRIMARY SUPPORT · TRUSTIFY TECHNOLOGY

DK *Nguyen*

Data Engineer — Trustify Technology

CONTACT METHOD	TIME ZONE
Microsoft Teams	Vietnam (GMT+7)

When you message, include:

- The Ticket ID (example: `TKT-005`)
- A screenshot of what you see

- What you were trying to do
- When it happened

Response time expectations

MON–FRI WORKING HOURS VIETNAM GMT+7

within 1–2 hours

EVENINGS / WEEKENDS

best effort, may be next business day

URGENT OUTAGE

ping DK directly on Teams with "URGENT" in the message

DO NOT

- ✕ Do not send real customer data to "test" if the system is slow.
- ✕ Do not share the dashboard URL or system details outside the authorized team.
- ✕ Do not attempt workarounds using real data "just once" — this violates the data safety rule.

Acknowledgment and *Sign-Off*

OFFICIAL

By signing below, you confirm that you have read and understood this handover guide, and that you agree to:

01 Use only fake/mock/fabricated data when testing this system.

02 Never submit real customer names, phone numbers, NRCs, account numbers, or financial data.

03 Always send request emails from your `@zeyalabs.ai` account to `emoney@zeyalabs.ai` .

04 Take full responsibility for the data you submit.

05 Contact DK Nguyen for any questions before using the system.

06 Acknowledge that this system is in testing phase and not yet certified for enterprise banking use.

07 Acknowledge that Trustify Technology is not liable for any data exposure caused by misuse.
