Description

- If the ticket is **salarytoMA** type, display below field
  - Employee list (display 4 columns: Sl No, from Wallet, to Wallet, emoney amount)
  - AI Analysis (display data extraction from email and from attachment, compare side by side between these fields: Company name, Initiator Name, total amount, pay date, Purpose, Cost Center) - highlight green for matching field, highlight yellow for mismatch field
  - Original Email
  - Original Attachment
  - Remove Approval Status and Processing Status, we don't check this information to proceed, we just make sure our pipeline capture enough data to generate CSV file for Finance
  - Display a button name "Generate CSV for Finance" if the ticket has enough information (Company name, Initiator Name, payment type, total amount is correct, pay date, Purpose, Cost Center, valid phone number / bank account)
  - Display a warning message "Inform client for missing data" if the ticket doesn't have enough information and amount mismatch, list out those missing information
- If the ticket is **salarytoOTC** type, display below field
  - AI Analysis (display data extraction from email and from attachment, compare side by side between these fields: Company name, Initiator Name, total amount, pay date, Purpose, Cost Center) - highlight green for matching field, highlight yellow for mismatch field
  - Original Email
